

During the afternoons parents witnessed exciting experiments being performed in the different Science laboratories in Chemistry, Physics & Biology. In the Modern Languages Department they heard students proudly express themselves in German under the excellent tutelage of Herr Wahl. With English being the main & official language of Elia's they visited English Language & Literature classes where many students waxed lyrical about metaphorical or Shakespearean language or battled with the intricacies of efficient essay writing.

In two days it is virtually impossible to demonstrate everything that is being achieved in Elia's Secondary School by students & teachers alike, from Year7 up to Year12 or Lower Sixth Form.

Everybody involved in these successful Open Days is already looking forward to those being planned for next term.
