

Students can choose to take either a one or two year course as a career path, to increase their points for UK University. They also have the opportunity to gain lifelong skills, including communication, research and development. They are given the chance to experiment, be innovative, intuitive and imaginative; in addition they develop their English language to include the historical and technical terms that are used in the world of art and design.

The course is planned to give the student an appreciation of practical design problems and instruction on how to solve these, as well as perhaps one of the most important life skills which is the development of self-motivation and organization in preparation for university. The photographs shown are some of our student's works.
